### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Diane Dunn McKay (the Undersigned Attorney, Reg. No.34,586) on 9/14/2005.

The application has been amended as follows:

#### **IN THE CLAIMS:**

In claim 19 (page 3 of the claims, line 26), after the phrase "n=1, ..., N", please **delete ",", insert "**.

#### ***Allowable Subject Matter***

3. Claims 15-29 allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:

*The above mention claims are allowable over the prior art of record does not appear to each or render obvious the claimed limitations in combination with the specific added limitations as recited in independent claims and subsequent dependent claims.*

*For independent claim 15, none of the cited prior art discloses a computer system comprising a combination of: determining access probability of access to said*

*pull content from said stored data, determining an average hit rate for said pull content from said stored data, determining said average response delay for said pull content from said stored data determining average wired network access latency for said pull content from said access probability, said average hit rate and said average response delay, storing said pull content in said cache based on said determined average wired network access latency when there is no said pull content in said cache or said pull content has expired.*

*For independent claim 25, none of the cited prior art discloses a system comprising a proxy gateway connected by a first network to a plurality of mobile users and by a second network to at least one Web server comprising a combination of steps of: computing a first probability that the measured geo-location position and behavior is an actual position and behavior of each of mobile users, determining a state sequence estimation variable for each of said mobile users by iteration over time from a second probability that each of said mobile transit in a geo-location and behavior sequence and determining a current state for each of mobile users from said state sequence estimation variable.*

**Conclusion**

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Khanh Dinh whose telephone number is (571) 272-3936. The examiner can normally be reached on Monday through Friday from 8:00 A.m. to 5:00 P.m.
